

PROHIBIT-ICH

Prevention Of Hypertensive Injury to the Brain by
Intensive Treatment in IntraCerebral Haemorrhage

NEW YEAR GREETINGS

Dear all PROHIBIT-ICH collaborators,

We would like to start the New Year by taking this opportunity to thank you for your patience during the last year and to update you on the progress of the trial.

We would also like to give you an important date for your diary and hope you will be able to make it.

SAVE THE DATE! TRAINING DAY

!! We are arranging a training day for each site, which will be held at Oxford on Tuesday 13th March 2018 !!

Ideally we would like the Principle Investigator and a Research Nurse from each site to attend. Lunch will be provided from 12pm and the session will start at 1pm

The Chief Investigator; Professor David Werring and Co-Chief Investigator; Professor Peter Rothwell will discuss the project in more detail and will give you an opportunity to ask questions.

Also, there will be a chance to see how the blood pressure monitoring devices will work. Confirmation of the venue will follow in an email.

Could you please kindly confirm if you are able to make it by contacting the trial co-ordinator Shahena; shahena.butt@ucl.ac.uk

TRIAL STATUS

Nationally, 13 centres have been asked to participate (UCLH, Oxford, Glasgow, Edinburgh, Cambridge, Manchester, Newcastle, Imperial, Nottingham, King's, St George's, Royal Preston and Sheffield) and have agreed to take part. We anticipate you all will be able to continue to support us to get this exciting trial up and running this year.

The trial protocol underwent a review process through the steering committee members and before the protocol was finalised and was submitted to R&D for provisional sponsorship approval and is currently being reviewed. When provisional sponsorship is granted we will submit to Ethics and HRA approval. Once approval is in place we will be able to carry out the necessary site set-up and contracts will be finalised.

We are aiming to start patient recruitment from April 2018.

We are excited to get this trial up and running this year and we would like to thank you again for your continued help and support!

Kind regards,

Shahena Butt
Study Co-ordinator

David Werring
